

Climate Research and Risk Management Organizations

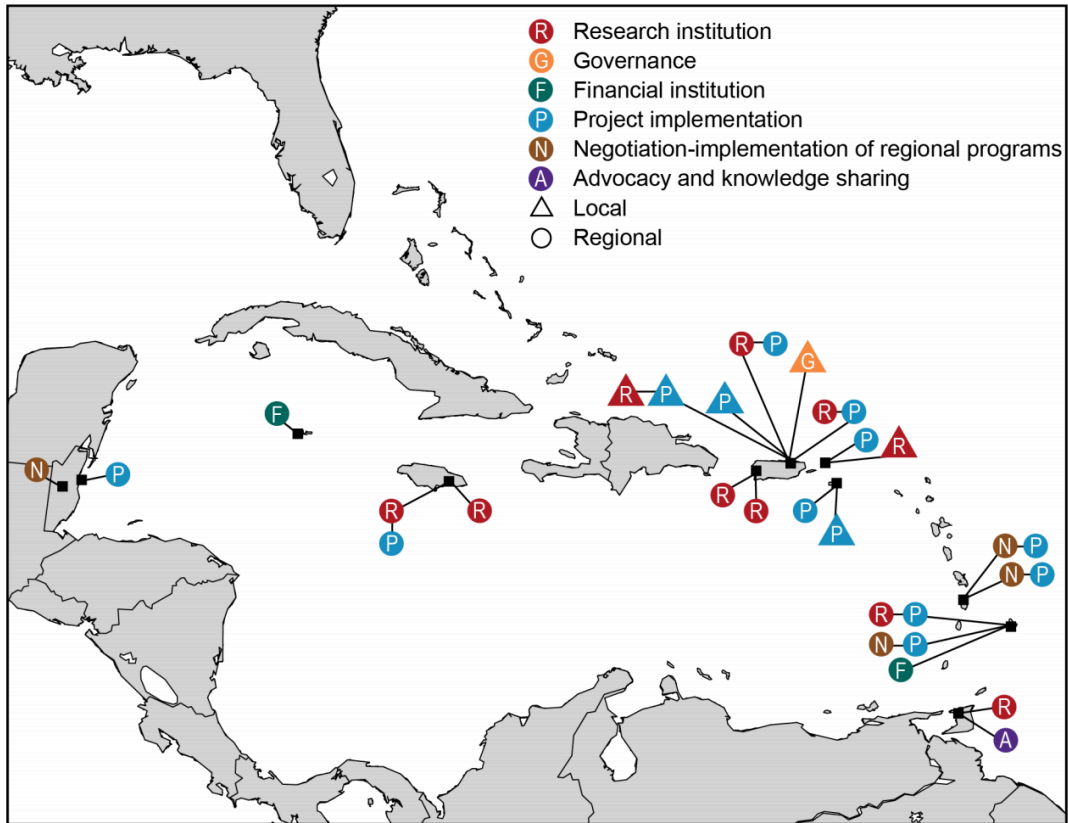

Figure 20.18: Some of the organizations working on climate risk assessment and management in the Caribbean are shown. Joint regional efforts to address climate challenges include the implementation of adaptation measures to reduce natural, social, and economic vulnerabilities, as well as actions to reduce greenhouse gas emissions. See the online version of this figure at <http://nca2018.globalchange.gov/chapter/20#fig-20-18> for more details. Sources: NOAA and the USDA Caribbean Climate Hub.
