

Southeast Climate Adaptation Science Center Global Change Research Fellows Program

Building capacity for the next generation of scientists by providing financial, scientific, and professional development support for NC State graduate students interested in multi-disciplinary global change research.

Program Eligibility

- Incoming/current Masters or PhD student
- Commitment to global change research

Benefits

- Networking
- Diverse community of students & faculty
- Professional development

Funding

- Tuition
- Competitive stipends + health insurance for one year

Capacity Building

- Climate Adaptation Science Retreat
- Global Change Seminar Series

Southeast Climate Adaptation Science Center Global Change Research Fellows Program

*The SE CASC Global Change Fellows Program has provided me with the privilege of learning from so many incredible experts in their field, as well as some valuable perspectives from individuals with these lived experiences of **global change impacts**. The knowledge that I have gained about **environmental inequality** and the inherent value of traditional knowledge has forever changed the way that I will conduct my research, and I hope to be a more responsible scientist from this point forward.*

- Kate Gorman, 2020-2021 Fellow
Biology Graduate Student at NC State University

WHERE DO OUR FELLOWS FIND EMPLOYMENT?

- ➡ Academia
- ➡ Federal Government
- ➡ Private Industry
- ➡ State Government
- ➡ Non-governmental organizations
