

Upcoming webinar

# EXTREME DISTURBANCES AND CLIMATE CHANGE IN THE SOUTHEAST US

TUESDAY, SEPT. 26, 8 AM TO NOON CT

Register: click  
here or use QR

We invite land managers, emergency response personnel, policymakers, and practitioners across Tribal Nations and other governments to learn more about the science of extreme disturbances, their impact on lands and forests, and related management challenges and opportunities. The presenters will focus on fire regimes, invasive species, storms, flooding, and more.
